BN associates

Python Developer Intern

Description

We are seeking a motivated Python Developer Intern to join our development team. This position is perfect for recent graduates (2022-2024) who are enthusiastic about coding and eager to contribute to Python-based projects. You will work on developing and maintaining software applications and scripts.

Responsibilities

- Assist in developing, testing, and maintaining Python applications and scripts.
- Collaborate with senior developers to design and implement software solutions.
- Write clean, efficient, and reusable code.
- Participate in debugging and troubleshooting issues.
- Learn and apply best practices in Python development and software engineering.

Qualifications

- Bachelor's degree in Computer Science, Software Engineering, or a related field (2022-2024 passout).
- Basic knowledge of Python programming and its frameworks.
- Familiarity with version control systems like Git.
- Strong analytical and problem-solving skills.
- Ability to work collaboratively in a team environment.

Preferred Qualifications:

- Personal projects or academic experience using Python.
- Understanding of web development frameworks like Django or Flask.
